

**IMPROVEMENTS IN THE WORKS: MAKING PROGRESS**

While this is City and County of Honolulu’s comprehensive list of High Pedestrian Injury Locations, safety improvements were already under development or being actively considered as part of planning projects at seven of the High Pedestrian Injury Corridors and 24 of the High Pedestrian Injury Intersections/Crossings. Many of these locations will receive improvements within the next five years. These locations that had safety improvements underway are shown in **bold** in **Tables 7 and 8**.

**High Pedestrian Injury Corridors**

- Comprise 2% of City Streets
- Account for 60% of All Pedestrian Fatalities
- Account for 43% of All Pedestrian Injuries

**Table 7: High Pedestrian Injury Corridors**
