TO ALL CONCERNED:

SUBJECT: Kuahea Street Area Stabilization Project

This is an update on the City's plan for work in the Kuahea Street and Waiomao Road area.

The City's efforts to construct improvements to stabilize its property and associated infrastructure along Kuahea Street between Kuahea Place and Helo Place and along Waiomao Road in the vicinity of 2293 Waiomao Road are substantially complete. Both phases of work to install tieback anchors and a soldier pile and tieback wall system are complete. Other completed construction activities beyond stabilization improvements include temporary and permanent utility relocations and the reconstruction of the concrete roadway along Kuahea Street between Kuahea Place and Helo Place.

The remaining work includes the installation of monitoring equipment, the installation of street lighting along Kuahea Street, and the installation of fencing, erosion control matting, and vegetation within City-acquired properties. Pending the installation of street lighting, the reopening of Kuahea Street to vehicular traffic is anticipated in October 2023.

While there may be incidental benefits to private properties from the stabilization improvements, area residents and private property owners should take precautionary measures to protect themselves and their own private property from earth movements. You may wish to seek advice from an engineer or other professionals regarding this matter.

We appreciate your continued patience and cooperation. Project updates will continue to be posted on the Department of Design and Construction website at www.honolulu.gov/ddc. Please contact Scott Ishikawa of Becker Communications Inc. at 808-397-5396 if you have any questions about this Project.

Sincerely,

A handwritten signature in blue ink, appearing to read "Haku Milles".
